CONTROP's family of air defense systems provides a broad and unique response to every present and future threat by unmanned aerial systems at any distance.

These air defense systems provide maximum sensor range performance using extremely sensitive sensors, gyro stabilization and unique video enhancement algorithms. These systems can be mounted on various platforms and withstand severe environments and harsh conditions; operating in all weather situations.

CONTROP's EO/IR air defense systems can be integrated to meet any system integrator's technical requirements and needs, utilizing CONTROP's open architecture, standard SDK and a simple integration approach.

CONTROP's efficient LCC is based on a very wide installation base and maintenance philosophy.

Configuration

Fixed
Mobile
Deployable

Features

Edge AI based ATR
ROI image enhancement
VMD to Tracker automatic transition
Standard generic interfaces
Superb LOS Stabilization
High Performance (velocity & acceleration) gimbals

A solution to the range of threats

Open architecture

Simple integration

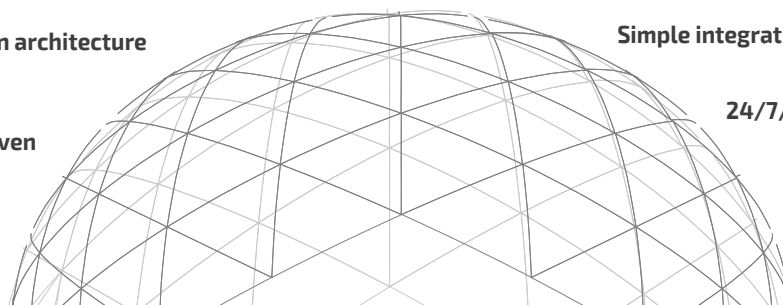

Battle proven

24/7/365 operation

Life cycle support

Worldwide systems

CONTROP standard interface
with supported SDK
